

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 7, line 4, which starts with “The server 4 is provided...” with the following amended paragraph.

The server 4 is provided with a CPU 41 for carrying out a composing process (which will be described later), etc. on pickup images and an image memory 42 for storing the resulting composite image, etc. Interfaces 43, 44 and 45 are electrically connected to the CPU 41 so that signal transmission and receipt are carried out among the CPU 41, the live camera 2 and the direction-altering section 3 through the interfaces 43, 44 and 45. Moreover, the server 4 is provided with a communication-use interface 46 for receiving an access from the user and for transmitting the digital information, and a display section 47 such as a lamp ~~41~~ 48.
